Drivers

Protocol for drivers

- ▶ All Transekur drivers will be tested every 15 days to make sure they are virus-free. In the event that anyone presents any symptom in the interval of those 15 days, they will be immediately set aside and submitted to the corresponding evaluations.
- ▶ On a daily basis, drivers will be submitted to body temperature checks with projection thermometers to ensure that none are showing symptoms of any viral process (like influenza, and others). Any collaborator who shows symptoms of a viral process will be quarantined and the health authorities will be alerted immediately.

Protocol for drivers

- ▶ At the beginning of each working day, every driver will be fully sprayed with a mist containing the disinfection formula prescribed by the Center for Disease Control and Prevention of the United States federal government, which consists of a mixture of $\frac{1}{4}$ distilled water and $\frac{3}{4}$ of 99.9% pure isopropyl alcohol.
- ▶ All our drivers will use KN95 masks, translucent face visors and nitrile gloves.

Protocol for drivers

We have installed in each of our dispatch centers a **disinfectant tunnel** for the **mandatory** use of our drivers and staff.

Vehicles

Disinfection protocol for our vehicles

1

There will always be disinfecting gels in all Transekur vehicles for our passengers and for our drivers.

2

We will disinfect with 99.9% purity isopropyl alcohol, the surfaces of the vehicle subject to the most contact, such as door handles, air conditioning controls and window controls.

3

Each vehicle will be sprayed, both inside and outside, with a mistifier containing the disinfection formula prescribed by the Center for Disease Control and Prevention of the United States federal government. This process will be executed every time a vehicle returns to base.

Customers

Protocol for customers

Our policy regarding the **amount of passengers per vehicle** will be discussed separately with each institutional client, and it shall be applied safeguarding the norms of physical distancing that guarantee the health and well-being of our passengers and drivers.

Protocol for customers

Tansekur customers **will have to use protective masks** when boarding any of our vehicles. In the event that a passenger does not have one, Tansekur will provide it.

If you present signs of any viral process, or have any symptoms associated with Covid - 19, please refrain from requesting transportation services and contact the health authorities.

Protocol for customers

The use of the **mask** will be **mandatory** to board our vehicles.

If you don't use a mask, **Transekur will not provide the service.**

Thanks!
